

Sajjad Baloch

Python Developer

Karachi, 75500 Sindh 03048467517 sajjad.aiengineer@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented and highly collaborative Python/AI Engineer with strong organizational skills and a proven ability to manage multiple projects efficiently. Adept at solving complex technical problems with an analytical and results-driven mindset. Experienced in developing and integrating **LLM agents** using advanced **AI technologies** such as **OpenAI**, **Rasa**, and **GPT** for dynamic, context-aware conversations. Committed to delivering high-quality code while meeting tight deadlines and demanding project objectives. Skilled in working within cross-functional teams to design and implement innovative AI solutions, ensuring scalability, performance, and maintainability in all development phases. Dedicated to continuous improvement and adhering to best practices in software engineering.

SKILLS

Python	Java
User requirements analysis	Testing
Troubleshooting	API Development
Python Django	Django framework
Linux Environment	Flask framework
Project Planning	OpenCV Library
Microservices Architecture	Problem-Solving

WORK HISTORY

PYTHON DEVELOPER 08/2022 to 06/2024

JS Bank | Clifton, Sindh

- Integrated **OpenAI GPT models** and **Rasa** to deliver dynamic and context-aware responses to users, improving customer satisfaction and reducing manual intervention.
- Created REST APIs using **Flask** and **Django** to handle chatbot interactions, ensuring scalability and maintainability.
- Implemented **Celery** with **Redis** for background task management, handling asynchronous processes and job queues for real-time chatbot responses.
- Utilized **WebSocket** and **asyncio** for asynchronous communication, optimizing real-time interaction between the system and users.
- Worked with FastApi, FlaskApi, Django
- Worked independently to design, develop and test code
- Automated repetitive tasks using Python scripts, increasing efficiency within the team's workflow processes
- Ensured timely delivery of high-quality products through diligent project management and prioritization of tasks
- Improved application performance by optimizing Python code and implementing best practices

SENIOR SOFTWARE DEVELOPER

06/2017 to 12/2021

Teresol Private Limited | Karachi

- Trained new developers and programmers on company standards for design and review
- Discussed issues with team members to provide resolution and apply best practices
- Monitored ongoing operation of assigned programs and responded to problems by diagnosing and correcting logic and coding errors
- Created Micro Services along with Restful API on Quarkus frame-work
- Deployed docker images on Linux VM, Configured and run via docker Compose
- Worked with back-end developers to design APIs
- Reviewed code, debugged problems, and corrected issues
- Analyzed existing software implementations to identify areas requiring improvement

EDUCATION

Bachelor in Engineering | Software Engineering
Mehran Univeristy of Engineering And Technology, Sindh

- Degree Awarded with PEC Registered
- Tailor Management System, - Research Project
- Thesis Statement: Digit Recognition (Machine Learning Image Processing) Handwritten Character Recognition (Deep Learning)
- GPA: 3.48

Intermediate Level
Boys Degree Collage, Sindh

School | Middle School Education
Super Track Public School, Sindh

CERTIFICATIONS

- 06/01/21, Certified Python, Udemy
- 06/01/21, Certified Java Developer, Udemy

TECHNICAL PROFILE

- Postman
- SQL
- Linux
- Git
- Docker
